# Vertical Long-Shaft Chopper Pumps with Electric Motor 

 VPH

CHIOR

## ROBUST, DURABLE, VERSATILE

CHIOR ${ }^{\circledR}$ VPH is a Vertical Chopper Pump with external motor drive designed to chop up and lift any kind of livestock slurry, biogas digestate, as well as civil or industrial effluents.

CHIOR ${ }^{\circledR}$ VPH Long-Shaft Cutting Pumps with top suction and triple chopping tool excel through their high pumping capacity and cutting efficiency even under harsh working conditions. The design of the pump housing made of cast iron or stainless steel enables a wide range of possible applications.

The electric motor rotates the suction screw via the drive shaft. The chopping system enables shredding of coarse matter. The shredded material is conveyed out of the tank or pit through the stainless-steel delivery pipe. The MX-version conveys the material into the tank through a special mixing nozzle.

## Benefits

High-efficiency, low-energy consumption electric motor

High lifting efficiency thanks to top suction system
Efficient chopping system that prevents clogging
Anti-leakage design

## Technical Features

- IE3 motor (Premium Efficiency)
- 3-phase, 4-pole electric motor with IP55 protection
- Stainless-steel frame (transmission pole and delivery pipe)
- Torsional elastic coupling between motor and transmission shaft
- Oil-bearing drive unit
- Modular drive shaft delivers higher resistance to mechanical stress reducing vibrations

Anchor bracket for wall support

## Product range performance

* Values measured with clear water at $20^{\circ} \mathrm{C}$.

Results may vary by changing the operating conditions depending on the flow rate, density and viscosity of the liquid, the type and dry matter content of the manure (depending on type of animal feed), the height and distance of the support stand as well as the diameter of the pipe.
