压力安全阀

PRESSURE RELIEF VALVE

VCP

应用

用于料仓、料斗或集装箱顶部，避免其中压力过大或产生负压，从而造成料仓和收尘装置的严重损坏。

材料

所有与外部接触的部分都由碳钢制成，根据需要也可提供不锈钢材质。顶盖使用不锈钢制成，密封材料根据不同的应用环境而定。

APPLICATION

On top of silos and bins, hoppers or containers to avoid overpressure and negative pressure.
To prevent problems which could severely damage both silo and filter.

MATERIALS

All contact parts are made from carbon steel, on request from stainless steel.
Cover is made from stainless steel, seals according to application.

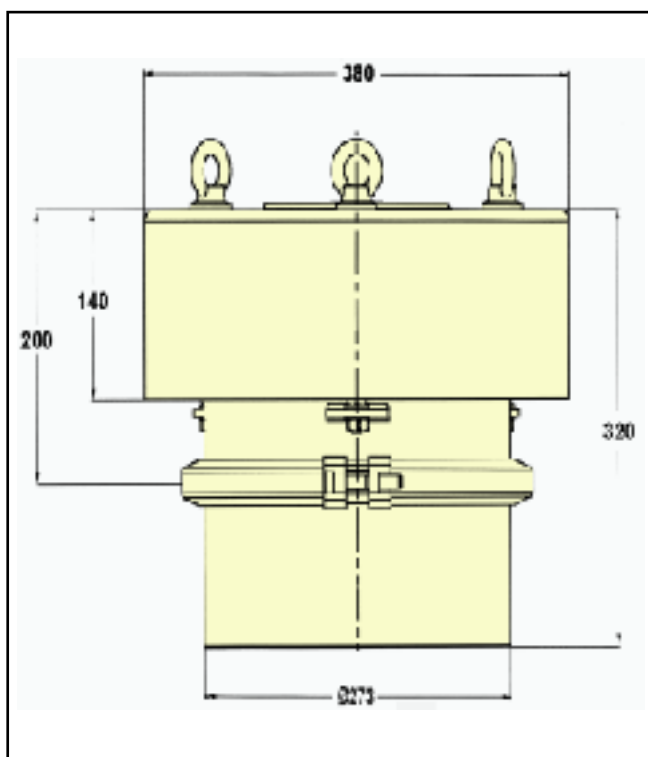

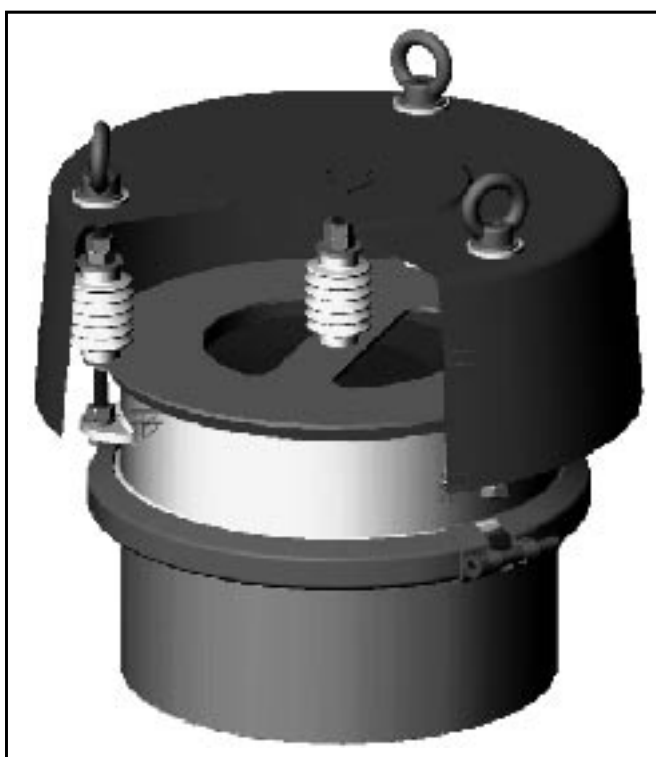

VCP

压力安全阀 PRESSURE RELIEF VALVE

事实上，只要是往料仓中加料或者排料，就会发生压力增大或负压现象。对于一个正确的运行系统，压力安全阀的使用是非常必要的，它可以释放料仓中过大的压力，同时也可以缓解负压情况。如果空气的输入或释放水平出现不正常，安全阀就会自动打开以防止可能出现的料仓损坏。

For a correct operation the application of a pressure relief valve is necessary in order to discharge possible pressure inside the silo, as well as negative pressure. In fact, there is pressure once you fill the silo and negative pressure when you empty it.

If air input and output are not correct the valve opens (one way or the other) and avoids possible silo damage.

技术参数 TECHNICAL DATA	型号 TYPE	正压范围 Pressure	负压范围 Negative pressure	重量 kg
	VCP273 B	280 → 1000 mm H ₂ O*	-20 → 120 mm H ₂ O*	9.5
